

HYPERSPORT DUCATI 1098s PISTON KIT

Öhlins Racing has been a vital part of the Ducati success story throughout the years in the Superbike and MotoGP racing series and the heritage continues in the special 1098s version that is equipped with advanced suspension technology from Öhlins to make an even more impressive and potent race bike.

The 1098s version will not only be a fantastic eye catcher at the local trattoria. The bike is born on the race track and many serious racing teams will take the bike back to its roots. For this reason Öhlins Racing has developed a special piston kit for the front fork, and a race setting for the rear suspension. This kit will ease your doubts considerably the next time you look over your digital MotoGP derived cockpit unit, pounding your L-twin 1099cc, 160 Hp full-blood race bike towards the next apex.

Are you going to race your Ducati 1098s? If yes, we got the racing kit for your front fork and rear shock.
